Call List

Use this randomly generated list as your call list when playing the game. There is no need to say the BINGO column name. Place some kind of mark (like an X, a checkmark, a dot, tally mark, etc) on each cell as you announce it, to keep track. You can also cut out each item, place them in a bag and pull words from the bag.

Gameplay:

- Distribute cards and markers: Provide each player with a Bingo card and markers (like chips, coins, or small objects) to cover the squares.
- The caller: One person acts as the caller, drawing phrases/words randomly from the container and announcing them the players.
- Marking the cards: Players listen for the announced phrase/word. If they have it on their card, they cover the corresponding square with a marker.
- "Bingo!": The goal is to be the first to get a complete row of covered squares (horizontal, vertical, or diagonal). When a player achieves this, they shout "Bingo!"
- Verification and win: The caller checks the winning player's card to ensure the marked phrases/words were correctly called. If verified, the player wins the round.
